Jim,

I prepped the District Chiefs last week which lead to a good discussion on overall adult program transformation. I handed out the document attached that we used in our meeting with Bruce, Mark and Dave. This morning I had a conference call with the Big 7 mgrs and San Pedro. I asked them to have an in-depth discussion with their staff on transformation in the broader sense and to identify staff. I will f/u next week with individual discussions with mgrs. Have a good weekend.

Jim,

I just spoke with Debbie about your meeting with the District Chiefs next week.

- 1) We are requesting that you are not on the agenda until approximately 3:30, Debbie won't be able to be there until then, and this way you won't have to sit through the whole meeting
- 2) Let me know if you need me to have copies ready.

~ Syl

We just talked to Maria and she will meet with us (Jim, you, Linda and me)

4/19/2006

after our meeting with Dr. Shaner at 4 pm. Maria can transition the Big 7 clients that have been enrolled in ACT to FSP once there is Board approval. Jim will meet with District Chiefs next week and talk about implementation of FSPs, as well as the "transformation" in each SA of the person assigned as the FFS hospital liaison/Impact Team leader to assume systems navigation responsibilities upon Board approval.
Sylvia - let Dr. S. know we only have an hour for his meeting.

Jim,

May 2nd is 2.5 weeks away. Staff will not be able to transition caseloads that quickly. I briefed the District Chiefs yesterday about the transformation and the approach we planned to take. I have a conference call tomorrow morning (Fri) with the Big 7 mgrs to initiate staff identification and the plan for transitioning clients.

My biggest concern is the transitioning of large numbers of clients out of our system within 3-4 weeks.

Regarding navigators- I will have a implementation plan ready for your review and distribution at the meeting.

I would like to discuss a plan for enrolling FSP clients in transformed clinics on May 2nd. Can you have something to discuss on Tuesday? Also plan for the implementation of the various kinds of systems navigators.
