Board of Supervisors
 Hall of Records, Room 501
 Los Angeles, Calif.

Dear sirs -

We do not want this mental Health Plan being forced on us by the medical profession. It is nothing less than mesmerism. Who gave a group of people the authority to deprive us of our freedom to choose our methods of healing, bestowed on us by our Federal Constitution? And who gave you authority to grant their unfair demands by submitting to them? No one will be safe from this evil. And who pays this great expense? We who do not want nor need these treatments. That is, many who do not want it. You all need to examine your thinking to learn what is influencing it, power, money, or what?

Please consider carefully the good of all concerned, including the Medical Profession. No good will come to them.

Yours respectfully
 Mrs. Maude A. Wilkinson
